Rental/Sales Inventory

Last Modified on 07/10/2026 2:17 pm EDT

Inventory Setup/Modification

RentalPoint uses an Inventory Treeview structure (Fig A below) to organize and manage the inventory your company will make available for Rental or Sale. Inventory **must be entered here** before it can be added to the equipment grid of a booking.

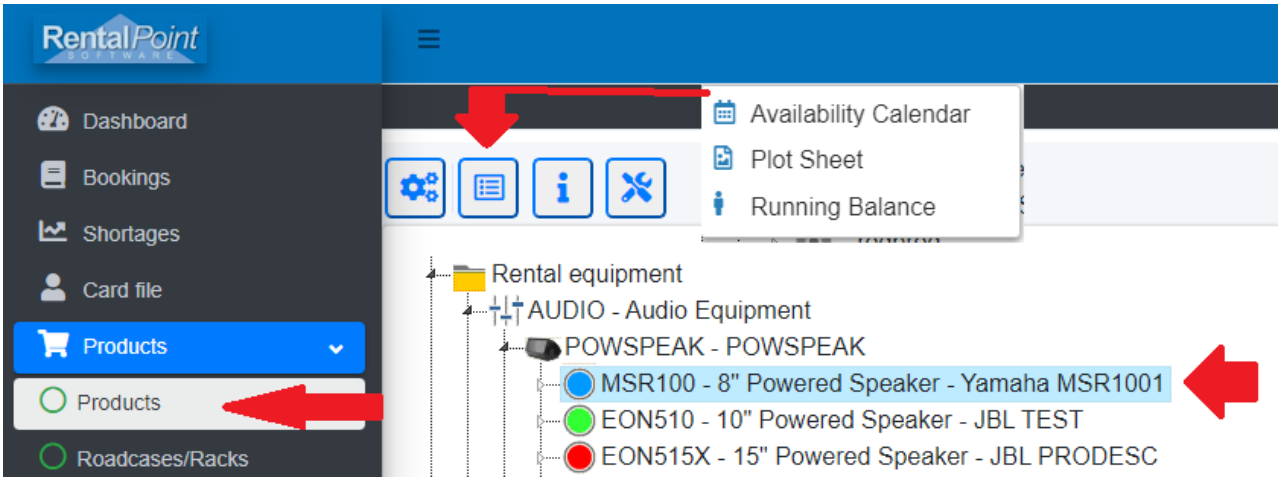

- Access the Product Setup/Management options via the gear icon  on the products menu (Fig B below) or via right click option on the Products page (Fig C below)
- Refresh the page using the Refresh option
- Collapse the Inventory Tree using the Collapse option
- Add New or Edit/Delete Existing Rental/Sale Inventory
- Duplicate Rental/Sales/Labour Products
- Move items in Inventory via Drag and Drop
- Find Products/Assets
- Change Prices for some/all inventory items
- Add Manufacturer information for one/bulk products
- Revisit items via the Recent Products Window

Product Availability & Usage

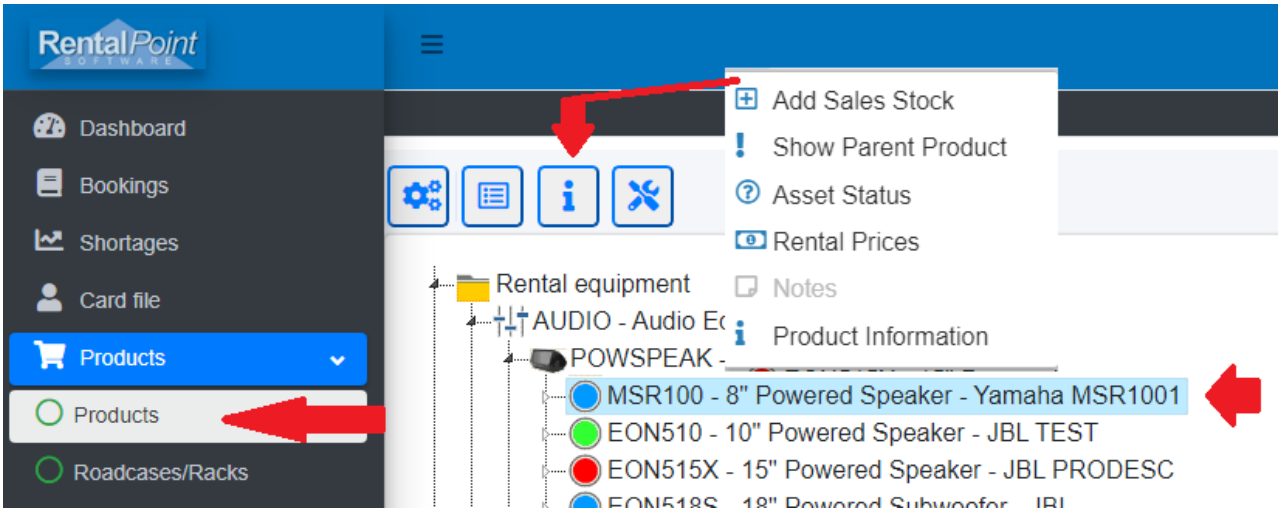

Explore where and when your products are being used via Availability Calendar, Plot Sheet and Running Balance.

For Multi-Location systems, Availability at All Locations may also be viewed

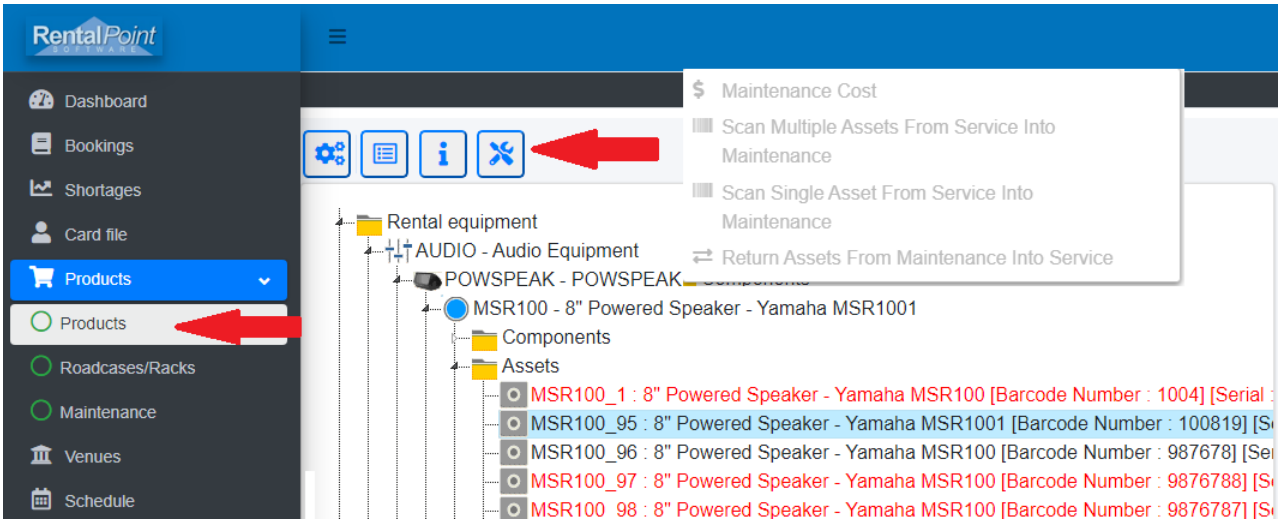

Product Information
