

Add Manufacturer Information

Last Modified on 03/06/2026 1:14 pm EDT

The manufacturer field is a later addition to the software. It can be populated by simply adding information in Inventory Setup per screenshot below

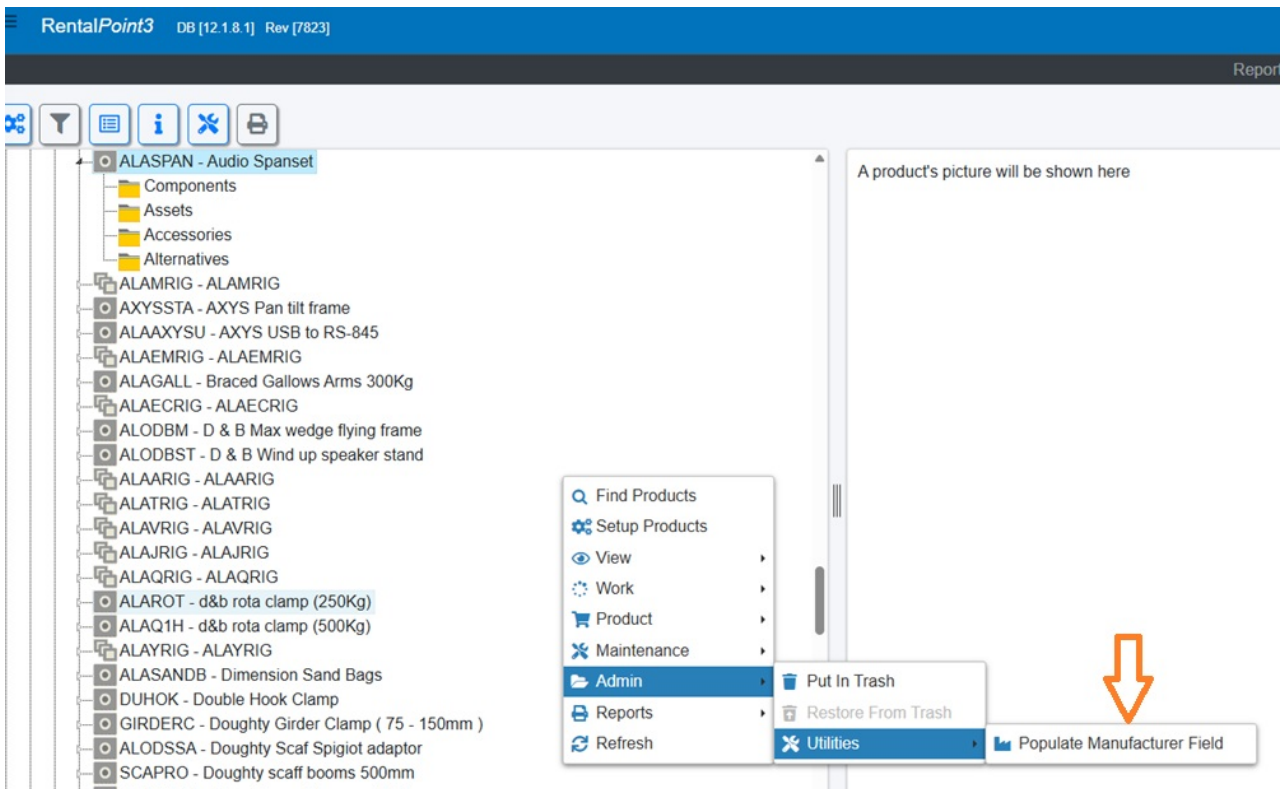

The screenshot shows the 'Edit Product Record' interface for 'Audio Spanset' in RentalPoint3. The interface is divided into four tabs: General, Picture, Rental Rates, and Sales. The 'General' tab is active, displaying various product details. The 'Manufacturer' field is highlighted with an orange arrow pointing to the value 'Spanset'. Other fields include Product Code (ALASPAN), Description (Audio Spanset), Model No., Color, Qty Owned (0), Country of Origin, Revenue Code, Default Accessory Discount (0.00), and Average Kwh usage (0.000). On the right side, there are sections for 'Description for Client F' and 'Product Options' with several checkboxes.

Field	Value
Product Code	ALASPAN
Description	Audio Spanset
Manufacturer	Spanset
Model No.	
Color	
Qty Owned	0
Country of Origin	
Revenue Code	
Default Accessory Discount	0.00
Average Kwh usage	0.000

Product Options

- For Individual Rents
- Barcode Track
- Don't allow product
- Product is a Generic
- Expand When Added
- Auto Checkout this
- Warehouse active

Alternatively you can bulk update manufacturer information for all product records where the field is currently blank using the utility available from Inventory Setup. Right click anywhere in the Inventory Setup window, then navigate to Admin-->Utilities-->Populate Manufacturer Field

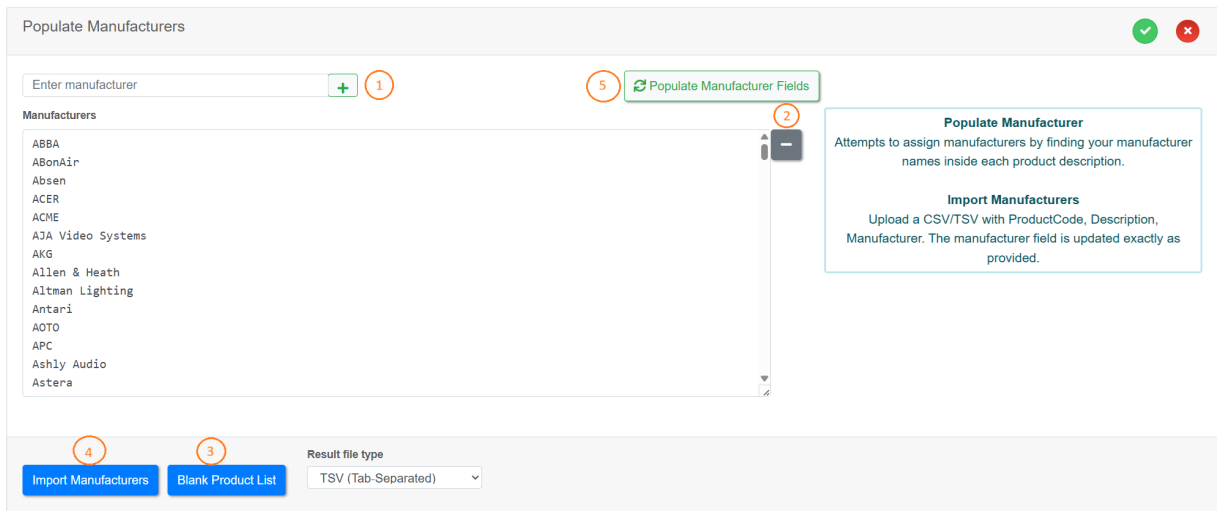

Reference Screenshot below for Utility Features:

1. Manually add manufacturers to the list as needed.
2. Manually delete manufacturers from the list as needed
3. Use the Blank Product List option to generate an output file with all products that currently have a blank manufacturer field
4. Use the import manufacturers option to update from your own manufacturer list using a .tsv or .csv file with fields below

	A	B	C	D
1	ProductCode	Description	Manufacturer	
2	GHH15	GHH 15 FLOOR STANDING SPEAKER	Atari	
3	GHH16	Floor standing speaker	Bose	
4	GHH17	Floor standing speaker	Sonos	
5				

5. To populate the Manufacturer field for existing product records using the manufactures list on screen, use the Populate Manufacturer Fields option. Here's how it works!

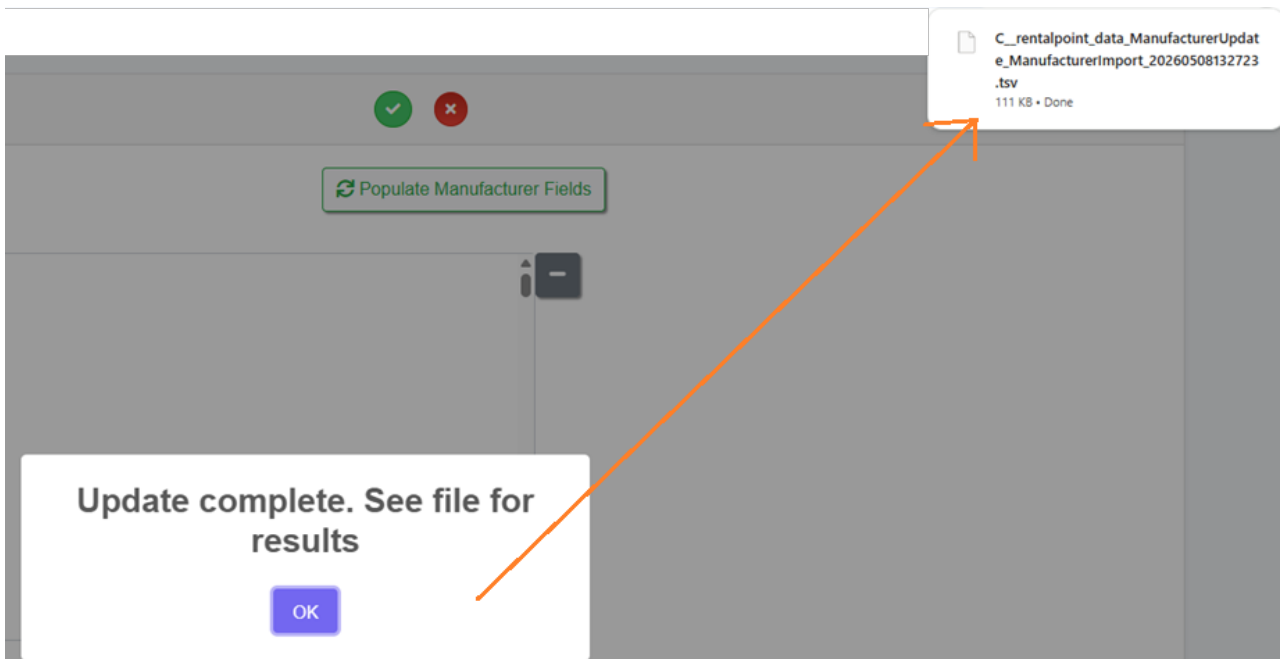

1. The utility scans each product description and searches for matches against the manufacturers listed in the window. When a match is found, the product's Manufacturer field is automatically updated.
2. A report of all matched records is generated as a downloadable file, which can be reviewed in Microsoft Excel or Notepad

When **Populate Manufacturer Fields** is selected, click yes to populate blank manufacturer fields with values from the list:

Find the output file in your downloads folder

All products updated will show a match and 'updated' action
