

Online Store

Last Modified on 06/08/2026 11:21 am EDT

Give your customers the convenience of booking rentals online with the RentalPoint Online Booking feature. This optional add-on allows clients to browse and request selected rental products directly from your website, anytime.

Once a booking request is submitted, it automatically appears in the Booking Grid, where your team can quickly review and convert it into a confirmed booking. It's a simple way to streamline the booking process, improve customer convenience, and save valuable time.

Contact support@rentp.com to find out how you can add the RentalPoint Online Store feature to your website

Already signed up? [Watch this video](#) on how to get started, then let us know if you need further assistance.
